ABOUT ME

Backend Developer with +2 years of experience in building secure and scalable applications using Node.js, NestJS, and Express. Skilled in REST APIs, database design (PostgreSQL, MongoDB), and authentication systems with a focus on clean code and backend architecture.

PROFESSIONAL EXPERIENCE

ONLINE EDUCATIONAL CENTER SEARCH PLATFORM

Backend Developer

2023 - 2025

- Implemented a complete authentication and authorization system, including route protection and role-based access.
- Applied security best practices to ensure user data protection.
- Designed scalable backend logic for managing users and educational center resources.

ONLINE SHOP MARKETPLACE

Backend Developer

2023 - 2025

- Developed core modules such as product management, user system, and shopping logic.
- Implemented CRUD operations, filtering, sorting, and pagination.
- Wrote unit and integration tests to ensure API reliability.

MY WORKERS

Backend Developer

2024 - 2025

- Built a real-time worker assignment and task tracking module.
- Enabled admins to assign tasks based on availability and monitor progress.
- Developed RESTful APIs and role-based access dashboards.

EDUCATION

Tashkent University of Information Technology

INFORMATION SECURITY - 9.210

2023 - 2027
